Best deals in July? Save money on markdowns:

Spend wisely: if any of these categories of items are on your "need to purchase" list, make note and hit the sales! Buying items just because they are on sale rarely pays off. Shopping smarter can help save you money when paired with a plan and a good budget.

Items that go on sale in July:

- Apparel. If you don't want to wait for end-of-summer sales, buy clothes now. You'll likely find a better price than you would've at the start of the season.
- Patriotic items. Retailers like a reason to celebrate. In the days leading up to the Fourth of July, there's usually an abundance of sales on red, white and blue products (and items that are all three colors), as well as on sporting goods, jewelry and furniture.
- Personal electronics. Black Friday is a big deal day that falls in November, but many retailers have added Black Friday in July sales, including Best Buy and Amazon (which features Prime Day). Expect discounts in nearly every product category.
